4 Integrated Design

Integrated housing design for better waterproof

5 Design Comparison

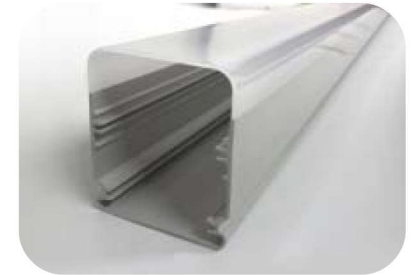

Others

Split buckle design: separated structure + sealing strip

the design philosophy is old and ordinary,
is neither practical nor artistic.

VS

Improved version of alu tri-proof batten lights.
It's equipped with a detachable terminal on both ends.
The detachable terminal is for easy wiring and quick installation.

Made with a completely new design with a modern appearance,
product shape is more appeal to the general public.

Can easily do the wiring according to the actual installation, give you more flexibility.
What's more, it's also highly efficient to link all the lamps together,
save wiring cost and installation time.

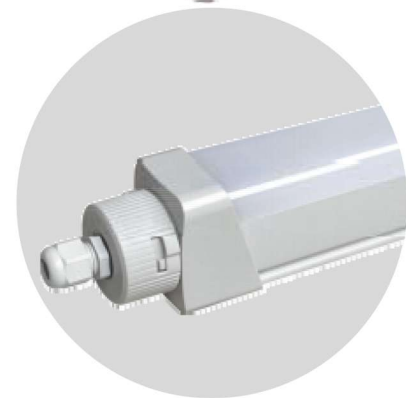

6 Seal and waterproof effect

Others

The old-fashioned rubber strip sealing method, can't completely fit the lamp body in practical applications, and it is easy to cause water ingress due to aging.

VS

Integrated design of the whole housing, and multiple airtight protected end caps, make the fixture achieves strict waterproof, gasproof performance and ammonia corrosion, and to have a real sense of long - time efficient IP65 protection performance.
